ABSTRACT

Enrollment data were collected and analyzed for the Los Angeles Community College District and each of its nine colleges for the years 1969 to 1979. The data were used to profile the District as a whole and each college in terms of: (1) Fall 1977 and 1978 enrollment in the categories of day/evening, male/female, full-/part-time, freshmen/sophomores, first-time/continuing, and under/over 21 years old; (2) Spring 1978 and 1979 enrollment in the same categories; (3) ethnic distribution; (4) age distribution; (5) total enrollment (1969-1979); (6) weekly student contact hours (WSCH); (7) WSCH per student; (8) average daily attendance for each academic year. Enrollment data were also collected for the instructional television and overseas programs. The district profile indicated that although total enrollment had grown since 1969, there was a 3.7% enrollment decline between Fall 1977 and Fall 1978, and a 4.9% decline between Spring 1978 and Spring 1979. The cancellation of summer session 1978 contributed to this decline. The largest enrollment declines occurred among full-time, male, day students. Although WSCH for 1978 and 1979 roughly paralleled the drop in enrollment, WSCH per student declined only slightly (0.6% in Fall and 0.1% in Spring), indicating a slowing in the trend toward lighter class loads. The enrollment report includes numerous tables and a glossary. (JP)

ABSTRACT

This research report provides historical data on enrollment, weekly student contact hours (WSCH), student load and average daily attendance (ADA) for the Los Angeles Community College District and each of its nine colleges covering the years 1969-1979, with particular emphasis on patterns in the last two academic years. Reference information is provided on enrollment in specific student categories such as age, ethnicity and sex.

Although the District has experienced many years of substantial growth since its inception in 1969, enrollment during the past year declined in both the Fall and Spring semesters. District enrollment was 124,523 in Fall 1978, a 3.7% drop from Fall 1977, and 120,161 in Spring 1979, a 4.9% decline from Spring 1978. This drop follows a trend of declining enrollment in community colleges throughout the state, but is less than the statewide decline of 10%. Nationwide community college enrollment appears to be largely unchanged from last year.

Factors related to the enrollment decline include a reduction in the number of classes offered in the District and the cancellation of Summer session in 1978. However, it is impossible to do more than speculate about the role that these factors actually played as causes for the decline.

In both semesters the largest enrollment declines in the District occurred in daytime students, with evening enrollment remaining virtually unchanged when compared with the previous year's figures. Declines were especially evident among male students and among full-time students (that is, among students enrolled in 12 or more units). There was a small increase in the percentage of enrollees over the age of 50.

Weekly student contact hours--the number of class hours in which students are enrolled each week--dropped by 4.3% in Fall 1978 and by 5% in Spring 1979, roughly paralleling the drop in enrollment. Student load--WSCH per student--declined only slightly (0.6% in the Fall, 0.1% in Spring), slowing the long-standing trend toward lighter class loads among students. Loads for daytime students actually increased for the first time since 1973.

Under the target budget system of community college financing in effect for 1978-79, state apportionment of funds is not linked to enrollment. The effect of current enrollment on future funding is unknown at this time.

GLOSSARY

Average daily attendance (ADA) is a measure of attendance that is calculated from weekly student contact hours. Apportionment ADA has been used to determine State apportionment to the District.

Census day is a fixed date during a semester (usually Monday of the fourth week of classes) at which time counts of weekly student contact hours and enrollment are taken for State reporting purposes.

Continuing students at a college are students who were enrolled in the same college during the immediately preceding semester.

Day students are students who are taking one or more classes convening prior to 4:30 p.m.; the category thus includes students who are taking both day and evening classes.

Enrollment is a "head-count" of the total number of students in a college or District; enrollment, unlike ADA, does not reflect the number of weekly student contact hours for which students are enrolled.

Ethnic status refers to racial affiliation as reported by students on a voluntary basis at the time of registration.

Evening students are students who are enrolled exclusively in classes convening at 4:30 p.m. or later.

First-time students at a college are students who were not enrolled in the college during the immediately preceding semester; the term includes both freshmen and transfers and also students returning to the college after an absence.

Freshmen are students who at the time of registration have completed fewer than 30 units of college credits.

Full-time students are enrolled for 12 or more units during a semester.

Part-time students carry less than 12 units.

Sophomores are students who, at the time of registration, have completed 30 or more semester units of college credit.

Weekly student contact hours (WSCH) are derived by multiplying the number of students enrolled in a class by the number of hours per week for which the class meets. A class with 10 students which meets three times a week would thus generate 3 x 10 or 30 WSCH.

DISTRICT PROFILE

Although the Los Angeles Community College District has experienced many years of substantial growth since its inception in 1969, enrollment during the past year declined in both the Fall 1978 and Spring 1979 semesters.

District enrollment in Fall 1978 dropped to 124,523, a 3.7% decrease from Fall 1977. Instructional Television and West Los Angeles College showed the only increases, but the increase at West (and a portion of the decrease at Trade) was related to the administrative transfer of the Airport Center from Trade to West in Spring 1978. The greatest percentage decreases were experienced by Southwest (down 14.8%) and Mission (down 12.5%).

Fall day enrollment dropped more (5.7%) than did evening enrollment (down only 0.6%), although day students still outnumbered evening students by three to two. Day enrollment increased only at West and in ITV, while evening enrollment increased at City, Harbor, Valley and West. (Evening students are defined as those enrolled exclusively in classes beginning at 4:30 p.m. or later.)

Enrollment for Spring 1979 totalled 120,161, a 4.9% drop from the previous Spring and the third consecutive year of declining Spring enrollment. Gains were posted by Southwest (5.5%) and Valley (1.9%), largely due to heavy enrollment increases among evening students. The greatest percentage decreases were experienced by Mission (down 13.7%) and ITV (down 46.2%).

As in the Fall, most of the Spring decline in enrollment occurred among day students (a drop of 8.4%), while the number of students enrolled in the evening increased 0.5%. Four of the colleges experienced substantial

daytime losses but had increases in evening enrollment: City, -11.3% daytime but +4.5% evening; Harbor, -5.1% daytime but +2.1% evening; Southwest, -11.4% daytime but +37.5% evening; and Valley, -4.2% daytime but +10.6% evening.

District and individual college enrollment statistics for the past two academic years are presented on page 8.

Analysis of Enrollment Decline

It is possible to postulate a number of "causes" for the enrollment declines during 1978-79, but it is extremely difficult to determine whether the postulated causes did in fact have any effect. For example, it can be said that a portion of the decline may have been due to a reduction in the number of classes offered by the district during the year. However, class reductions are an effect of enrollment declines as well as a cause, since classes that do not meet minimum enrollment levels are likely to be cancelled. The relationship between classes and enrollment is thus circular rather than "one-way."

An additional factor in the 1978-79 enrollment picture is the cancellation in Los Angeles and other districts of summer session in 1978. It may be argued that some Los Angeles students were diverted to the few districts maintaining summer school, and decided to remain in those districts for fall and spring. Again, however, there is no particular evidence that this has occurred.

Under the target budget concept of community college financing, in effect for 1978-79, state apportionment is not linked to enrollment. The question of whether current enrollment levels will affect future district

income will only be known when a long-term community college financing bill is passed by the Legislature.

Ten-Year Enrollment Comparisons

Ten-year District enrollment trends for the Fall and Spring semesters and seven-year enrollment figures for the summer session are presented on page 13.

Notwithstanding recent declines in enrollment, the District has shown substantial gains over the past 10 years. Fall enrollment has increased by 36% and Spring enrollment has grown 31.7% since 1969-70. While day enrollment has always exceeded evening enrollment and increases in day enrollment have far outdistanced those in evening enrollment, the rate of increase in evening enrollment has been more pronounced in the past six years.

No summer session was offered in 1978.

Two-year Enrollment Comparisons

District enrollment comparisons in selected student categories for the last two academic years are presented on page 9 for the Fall semesters and on page 10 for the Spring semesters. ITV and Overseas Program data are excluded from these tables as no comparable information has been collected.

An analysis of the data indicates the following trends:

--The percentage decline in male enrollment (5.7% in Fall, 5.3% in Spring) was approximately double the percentage decline in female enrollment. Females now outnumber males at every college except Trade-Tech,

comprising 53% of the student population Districtwide.

Part-time students (those enrolled in less than 12 units) continue to outnumber full-time students by over 2½ to 1. The percentage decline among full-time students has exceeded that of part-time students, topping 7% in both Fall and Spring. Among the colleges, City had the highest percentage of full-time students in both Fall and Spring (33%), and Mission had the lowest (13% in Fall, 12% in Spring).

--Freshmen students (those who have completed fewer than 30 semester units of college credit) outnumbered sophomores and above by an approximate two-to-one margin. Southwest, Trade-Tech and Mission continued to have the highest percentage of freshmen in 1978-79, while Valley continued to have the lowest percentage.

Age Data

Age data for the District's students for the past three Fall semesters are presented on page 11. They show little variation in percentages among the various age categories. The largest single group continues to be in the 20-24 bracket, comprising 29.1% of enrollees, followed by those students under 20 (21.8%). There has been a slight increase in students 50 years and older, who number 8,832 Districtwide.

Among the colleges, Pierce had the largest percentage of students under 20 (30.5%), while Mission (14.3%) and Instructional Television (15.4%) had the highest percentage of students 50 and older. The majority of Mission's students in Fall 1978 were above 30 years of age.

Ethnic Data

Student ethnic data for the past two Fall semesters are presented on page 12. However, since reporting of ethnicity by students is voluntary, any interpretation of ethnic trends must take into account the incomplete nature of the data. The colleges vary widely in the percentages of students reporting their ethnic status: Southwest, an inner-city college, had the highest percentage (94.8%), while Valley (52%), Pierce (66.8%) and Mission (63.7%), all located in the San Fernando Valley, had the lowest.

On the basis of this incomplete data, it appears that the District's ethnic composition changed little during the past year. There was a small decline in the percentage of Black enrollment and corresponding small increases in the percentages of Oriental and Spanish-surnamed students. White students, comprising 38.9% of all students enrolled in the District, are the single largest ethnic group reporting. Black students constituted the second largest group (28.1%), followed by Spanish-surnamed students (20.1%).

Weekly Student Contact Hours and Student Load

Weekly student contact hours--the number of class hours in which students are enrolled each week--for the District are presented on page 16. In 1978-79 District WSCH declined by 4.3% in Fall and by 5% in Spring, roughly paralleling the drop in enrollment.

Weekly student contact hours per student (student load), shown on page 17, declined only slightly (0.6% in the Fall, 0.1% in Spring), slowing the long-standing trend toward lighter class loads among students.

Loads for daytime students actually increased for the first time since 1973. Among the colleges, Mission, with its dispersed course offerings, had the lowest amount of WSCH per student, while the highest average load per student continued to be at Trade-Tech, with its specialized curriculum.

Comparative Enrollments at Other Institutions

A comparison of LACCD enrollment for the past two academic years with that of other nearby community colleges and universities is presented on page 15. Total non-LACCD community college enrollment in the county of Los Angeles also declined this past academic year, dropping by 1.8% in the Fall and by 3.9% in the Spring. In the Fall semester both Compton and College of the Canyons experienced drops of 21%, while Long Beach increased its enrollment by 7%. In the Spring, enrollment changes ranged from a 20.2% decrease at College of the Canyons to 3.6% increase at Long Beach.

Total enrollment at four-year institutions in the area declined slightly during the 1978-79 academic year, although UCLA's enrollment remained virtually unchanged and USC's increased by over 4%.

Statewide, the decline in community college enrollment exceeded that of the Los Angeles Community College District, topping 10%, according to figures from the State Chancellor's office. This decline was attributed to program cuts precipitated by post-Proposition 13 revenue losses. Nationwide, figures compiled by the National Center for Educational Statistics show a negligible increase of 0.1% for two-year institutions. Decreases were most evident in the full-time student category. Part-time female enrollees increased by 7.4%.

The Overseas Program

The Overseas Program enrolls U.S. service personnel and their dependents at military bases in the Far East, Iceland, Antarctica, the Caribbean, and four Strategic Air Command bases in the United States. Academic terms in the Overseas Program do not coincide with District semesters, but instead consist of five terms running nearly year-round, plus a short summer session. Enrollment data for the Overseas Program since 1976 is presented on page 117. Summer session enrollment is included with Term I figures.

A marked increase in overseas enrollment is evident in the 1979 terms. One contributing factor is an increased interest in education on the part of the military, especially in vocational and technical subject-matter areas, and a resulting increase in the amount of funds available for service personnel to pursue additional schooling.
